

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

CORUM Butler Smart ESG Fund

A Sub-Fund of CORUM Butler UCITS ICAV,

Managed by CORUM Butler Asset Management Limited -CORUM Life Capitalisation Shares (IE00BK72TL28)

OBJECTIVES AND INVESTMENT POLICY

- The investment objective of the Sub-Fund is to seek to achieve a positive long-term rate of return from investment in fixed income securities.
- The Sub-Fund will primarily invest in European high yield fixed income securities issued by corporate entities. The Sub-Fund may also invest in fixed income securities issued by government entities. Fixed income securities are debt instruments (such as bonds) which provide investors with a fixed return, typically consisting of the repayment of their initial investment plus an amount of interest, but other forms of repayment or return are possible. High yield securities (also known as below investment grade securities) generally have lower credit ratings, but pay higher rates of interest, than investment grade securities which have higher credit ratings but which conversely tend to pay less interest.
- Environmental, social and governance (ESG) considerations are fully integrated into the investment process through the use of third-party ESG ratings and analysis from Sustainalytics or other equivalent service providers and through the application of the investment manager's ESG filters and selection process which involves monitoring issuers to ensure that the Sub-Fund only invests in issuers whose ESG ratings are into the top 80% of the investable universe in terms of ESG ratings. Changes in issuer ESG ratings are reviewed on a monthly basis and holdings of issues that are no longer in the top 80% of the investable universe are liquidated.
- Companies that do not respect the principles of the United Nations Global Compact on human rights, working conditions, the environment and the fight against corruption are also excluded from the investment universe.
- In addition, issuers are excluded based on an analysis of their exposure to controversial activities and sectors (such as weapons, pornography, alcohol and tobacco) if such activities account for more than 10% of their turnover.
- Finally, the Sub-Fund will not invest greater than 10% of its Net Asset Value in issuers not covered by an ESG rating.
- The Sub-Fund can invest in both investment grade and high yield securities, but it may have 100% of its investment in high yield securities at times. Investment in the emerging markets of Europe are typically not expected to exceed 15% of the Sub-Fund. The Sub-Fund will not be restricted to issuers in any industry or sector.
- The Sub-Fund may invest indirectly in the fixed income markets through derivatives instead of investing directly in individual securities. The Sub-Fund may also invest indirectly in financial indices, including major credit and equity indices, for hedging purposes. A derivative is a contract between two or more parties whose value is based on an agreed-upon underlying financial asset, index or security. The derivatives used by the Sub-Fund may include swaps, options, futures and credit default swaps. Forward foreign exchange contracts may also be used for hedging against the risk of changes in currency exchange rates.
- The Sub-Fund may take short positions in its investments for hedging purposes. This means the Sub-Fund will make a profit if the value of the investment goes down, but it will lose money if the value of the investment goes up. Unless the loss is capped or offset by another investment, it could theoretically be unlimited. The Sub-Fund will typically have up to 150% of its net asset value in long positions and 50% in short positions.
- The Sub-Fund may invest in open-ended and closed-ended collective investment schemes and open-ended exchange traded funds which enable the Sub-Fund to achieve its investment objective. The Sub-Fund may also invest in cash and money market instruments for cash management purposes.
- The Sub-Fund is actively managed, meaning the Investment Manager actively selects and invests the securities in which the Sub-Fund invests with the aim of meeting the investment objective of the Sub-Fund.
- Your shares do not pay income, but instead the Sub-Fund reinvests such income to grow your capital.
- **Benchmark:** The Sub-Fund is actively managed, meaning the Investment Manager will actively select, purchase and sell securities with the aim on meeting the investment objective of the Sub-Fund. The Sub Fund is managed by reference to an equally weighted combination of (1) the Markit-iBoxx EUR Liquid High Yield Total Return Index and (2) the return of the EURIBOR (1M) (together, a "Benchmark") for the purposes of determining the performance fees payable by the Sub-Fund. However, the Benchmark does not define asset allocation of the Sub-Fund and depending on market conditions the Sub-Fund may deviate significantly from the Benchmark.
- Recommendation: the Sub-Fund may not be appropriate for investors who plan to withdraw their money within 1-3 years.

RISK AND REWARD PROFILE

The risk category for this Sub-Fund is ranked at 3 because funds of this type have experienced low to medium rises and falls in value in the past. It is calculated in line with EU regulations and is based on the risk limit for the Sub-Fund. The risk and reward category is calculated using historical data which may not be a reliable indicator of this Sub-Fund's future risk profile. **The risk category shown is not guaranteed to remain unchanged and that the categorisation of the Sub-fund may shift over time.** Your initial investment is not guaranteed.

A category 1 Sub-Fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 Sub-Fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 Sub-Fund is not twice as risky as a category 1 Sub-Fund. When categorising the Sub-Fund it may happen that not all material risks were fully captured in the methodology. For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus. The

following risks may not have been adequately captured:

Counterparty Risk: A counterparty may fail in paying the proceeds of a sale of assets to the Sub-Fund or may fail in delivering securities purchased by the Sub-Fund.

Credit Risk: The risk that bond issuers may fail to meet their interest repayments, or repay debt, resulting in temporary or permanent losses to the Sub-Fund. Sub-investment grade debt securities generally present a higher degree of credit risk and the risk of loss due to default by these issuers is significantly greater.

Derivatives for Investment and Hedging Purposes: The Sub-Fund may use derivative instruments to establish 'long' and 'synthetic short' positions to meet its investment objectives. Derivatives use exposes the Fund to risks different from, and potentially greater than, the risks associated with investing directly in securities and may therefore result in additional loss, which could be significantly greater than the cost of the derivative.

Leverage Risk: Leverage arises from entering into derivatives whose terms have the effect of magnifying an outcome meaning the profits and losses from investment can be greater than if the investment is made directly in to the underlying securities.

For a more detailed explanation of risks, please refer to the "Special Considerations and Risk Factors" section of the prospectus.

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	1.70%
------------------------	-------

Charges taken from the Fund under specific conditions

Performance fee	15.00%
------------------------	--------

The ongoing charges figure is based on the fund's expenses for the year ended 31 December 2020. This figure may vary from year to year. It does not include portfolio transaction costs.

Performance fee: 15% of the annualised outperformance of the hurdle rate which is comprised of the return of (i) Markit-iBoxx EUR Liquid High Yield Total Return Index; and (ii) EURIBOR 1 month (as at the 05/08/2021, the second com-

ponent of the Hurdle Rate changed from "the return of the EURIBOR (1M) +1%" to "the return of the EURIBOR 1 month"). In the Sub-Fund's last financial year the performance fee was 0.00% of the Sub-Fund.

You can find out more details about the charges and how they are calculated by looking at the Sub-Fund's prospectus and supplement which are available at www.corumbutler-am.com.

PAST PERFORMANCE

Fund launch date: 10/10/2019

Share/unit class launch date: 25/03/2020

There is insufficient data to produce a useful indication of past performance for the Share Class.

PRACTICAL INFORMATION
